FP&A | Financial Modeling | Budgeting & Forecasting | Variance Analysis

## SUMMARY

FP&A analyst with 3+ years across Deloitte (Big 4) financial reporting and building an early-stage startup's first finance function; MS in Business Analytics, University of Maryland. Experienced in budgeting, forecasting, financial modeling, and variance analysis, using SQL and Python automation to turn financial data into clear recommendations for senior stakeholders.

## WORK EXPERIENCE

### Intern | Aztra.ai - Founding Finance Function

Apr 2026 - Present

- Built the company's first finance data system, consolidating fragmented revenue, COGS, SG&A, and CapEx sources into one reconciled SQL/Python dataset that gave leadership budget-vs-actuals reporting for the first time.
- Set up the first company budget with the founders, plus AR/AP forecasting and variance-tracking groundwork, replacing a fully manual process; the founders still review it monthly.
- Served as product owner for two client-facing products, gathering requirements, writing user stories, and resolving a scope mismatch so both delivered on a revised scope.

### Financial & Operations Analyst | University of Maryland Libraries (Part-time)

Feb 2026 - May 2026

- Built Helpdesk KPI dashboards and used SQL to fix data gaps in asset tracking and cost metrics, improving the accuracy of recurring reports.

### FP&A Associate Analyst | Deloitte - Multinational Intercompany Reporting

Sep 2022 - Aug 2024

- Supported annual AR budget (AOP) and forecast preparation, tying results to actuals monthly and forecasting collections with the team's predictive model to consistently achieve 90%+ of billing and collections targets.
- Led resolution of about \$3M in AR discrepancies through structured reconciliations and correcting entries, cutting reporting delays 20%.
- Delivered daily, weekly, and monthly KPI reports (collections, billings, net receivables, DSO) and PowerPoint decks explaining variance drivers to Audit, Tax, and Consulting leaders; led variance reviews for several months.
- Built automated Excel validation and control-testing tools with standard templates, cutting manual effort about 25%; wrote about 15 SOPs.
- Owned Ireland intercompany month-end close and reporting through stakeholder approval; supported U.S. entities in SAP S/4HANA and GAAP reporting.
- Owned an escalated Ireland reporting discrepancy across time zones, tracing it to a formula error in an upstream source file and correcting it.

### FP&A Intern | Idealabs FutureTech Ventures

Mar 2021 - Mar 2022

- Standardized 3 recurring reports across 4 teams with audit-ready templates, cutting reporting errors and revisions by 10%.
- Resolved 6 - 8 monthly budget-to-actual variances (3 - 4 material), cutting resolution time from 3 days to 2.

## PROJECTS

### Commercial Partnership Business Case | Excel, Python

- Built a 5-year Excel model comparing flat-fee, minimum-guarantee, and revenue-share structures for a live-sports streaming deal, recommending a guarantee plus revenue-share structure (\$122M probability-weighted NPV, Year-3 payback).
- Ran scenario and sensitivity analysis (subscribers the key driver, 0.72M breakeven) and validated the model with an independent Python rebuild.

### Consumer Credit Risk & Risk-Based Pricing Model | Python, scikit-learn, statsmodels

- Built a default-probability model on 9,578 LendingClub loans (0.66 hold-out AUC vs 0.62 FICO-only) and solved a break-even APR per loan, finding 20.7% under-priced.
- Set an approval cutoff by expected-profit optimization, raising backtested profit 45% (\$553K to \$803K) while cutting the approved default rate from 16.0% to 13.2%.

### Finance Forecast & Variance Automation | Python, Excel

- Built a rolling forecast and variance review with self-calibrating thresholds, cutting false-positive flags from 34.8% to 12.8% while catching all 6 known anomalies.

## SKILLS

- Financial Analysis & Modeling:** Budgeting & Forecasting, Financial Modeling, Variance & Driver Analysis, Scenario & Sensitivity Analysis, Business Case Development, Cash Collections Forecasting, KPI Reporting, Month-End Close, AR/AP Reconciliation
- Tools & Systems:** Advanced Excel (Pivot Tables, XLOOKUP/VLOOKUP), SQL, Python (Pandas), SAP S/4HANA, Tableau, Power BI, Power Apps
- Business & Stakeholder Management:** Executive Presentations & Commentary, Cross-Functional Collaboration, Stakeholder Variance Reviews, Process Documentation (SOPs), Requirements Gathering & User Stories

## EDUCATION AND CERTIFICATIONS

### University of Maryland, College Park - Robert H. Smith School of Business

Aug 2024 - Dec 2025

Master of Science - MS, Business Analytics (STEM-Designated)

### Osmania University, Hyderabad

Jul 2019 - Jul 2022

Bachelor of Business Administration - BBA, Finance

### Oracle Analytics Cloud 2025 Certified Professional

Oct 2025
